Notes:

- The percentage of students for whom there is usable salary information is 90.0%. (This calculation is made by dividing the number of job-accepting graduates for whom you have useable salary information/total job-accepting graduates)
- Only includes data for outcomes collected within 7 months of the latest graduation date of the student's graduation year.
- Only includes data for accepted jobs within 6 months of the student's graduation date.
- Only includes student with full-time jobs.
- I/D refers to instances with insufficient data. MBA Standard guidelines require a minimum of three data points for each category and that the number of data points is equal to or greater than one percent of full-time graduates seeking employment. Data points not meeting both requirements will still display the number of employed graduates, but will show "I/D" for all salary calculations.
- All compensation statistics do not include values where the student entered \$0 or did not respond.
